$$T_2 = \frac{1 - 451^2 f^2 L_2 C}{j^2 51 f C}$$

$$N_{\text{entre}} = \frac{7_{12}}{2_{1} + 7_{2}} = \frac{1 - 40^{2} f^{2} L_{2} C}{j \cdot 20 f C}$$

$$= \frac{1 - 4\pi^2 f^2 L_2 C}{1 - 4\pi^2 f^2 L_2 C} - 4\pi^2 f^2 L_1 C$$

$$= \frac{1 - 47^2 f^2 (1+12)C}{1 - 47^2 f^2 (1+12)C}$$

Question #4:

 $R_{pol}$ :

$$V_{cc} \frac{R_{pol}}{R_{pol} + 2R} = 1,4V \rightarrow R_{pol} V_{cc} = 1,4R_{pol} + 2,8R$$

$$R_{pol} (V_{cc} - 1,4) = 2,8R$$

$$R_{pol} = \frac{2,8R}{V_{cc} - 1,4}$$
